BENTON, KENTUCKY, FRIDAY, SEPTEMBER 15, 1939

\$1.00 PER YEAR

MARSHALL DAIRY FARMERS MEET HERE ON FRIDAY

\$25,000 Is Spent
Annually Here For
Dairy Products

County Agent Ed Rothwell in cooperation with the County Health Department met with the dairymen of Marshall county last Friday night. The purpose of the meeting was to discuss the present demand for dairy products and to consider organization.

At present people of Marshall county are spending approximately \$25,000 annually for dairy products. It is surprising to learn that approximately 88 per cent of the money spent for dairy products in Marshall county goes to pasteurization plants and dairymen in neighboring counties and has been going there for years.

The dairymen of Marshall county are spending money to equip themselves to produce better grades of milk. There is one dairy in Marshall county that will produce Grade A raw milk in a short time. To produce Grade A raw milk is an expense to the dairymen, yet it means more business and protection to the customer and producer. When you purchase Grade A raw milk you are assured that the cows are healthy, and the dairymen and his employees are healthy, the dairyman and milk house are of such materials and construction as to favor cleanliness, the utensils are of an approved design, the water supply is safe, all human waste is disposed of in a sanitary manner on the dairy farm, a disinfectant is used in the cleaning of all surfaces which the milk contacts, the milkers' hands and the cows' udder are disinfected before milking, milk bottles are capped by machine, the milk is cooled immediately after milking to 50 degrees and many other precautions are taken that provide added protection to the consumer.

Recently milk samples were taken from various sources of milk offered for sale in Marshall county and sent to the laboratory for a test. The Dairy mentioned above that will conform to Grade A requirements at as early date made the best on the test. The bacterial plate counts ranged from 18,000 per c. c. to 165,000 per c. c. These figures indicate the results of proper handling of milk. Grade A raw milk is not to exceed 50,000 per c. c. When bacterial plate count is low the milk is safer, tastes better and is in demand.

The Standard Milk Ordinance that was recently passed provides an opportunity to the dairymen of Marshall county. It not only means an opportunity for the dairymen to earn more money but it means that approximately \$22,000.00 going annually from Marshall county to business men in neighboring counties may be spent at home.

TVA KNOXVILLE INFORMATION HEAD REPORTS MARSHALL MEN LEAD ALL COUNTIES IN WORK AT BIG DAM

175 Marshall Countians and 147 from McCracken County Employed; Henle Tells of Employment Policy Used by TVA

Word was received here this week from Maurice Henle, of the Tennessee Valley Authority Information office in Knoxville, Tenn., stating that more Marshall county men are employed on the Gilbertsville dam than from any other one county. The information was sent here after some complaints, both written and verbal, had been made concerning the lack of local employment on the \$112,000,000 Gilbertsville Dam.

"The number of hourly rated employees giving their residence in Marshall county is 172. Three annually rated employees gave their residence as Marshall county."

McCracken Is Second

"The next highest number was 139 hourly rated employees and 8 annually rated employees from McCracken county, Ky. The total number from the State of Kentucky was 34 annually rated employees and 517 hourly rated employees. There were 859 hourly rated employees and 380 annually rated employees for a total of 1,239 at the time the checkup was made," Henle concluded.

Employment Policy

Because of continued requests for information concerning the employment policy of the TVA in connection with the Kentucky project at Gilbertsville, the Tennessee Valley Authority issued the following statement:

"The Tennessee Valley Authority Act contains the following clause governing the appointment, selection, and promotion of employees of the Authority:

"In the appointment of officials and the selection of employees for said Corporation, and in the promotion of any such employees or officials, no political test or qualification shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency."

As a part of the Act of Congress creating the Authority this is a statutory requirement which has been effectuated by the establishment of standards and procedures which apply to all employment in the Authority.

Nation Wide Recruits

The area from which the professional, administrative, and clerical staff is recruited is nationwide, but it has been the policy of the Authority to attempt to utilize in its construction projects workmen available in the Tennessee Valley area in view of the fact that the supply of skilled, semiskilled and unskilled workmen in this area has been found to be almost wholly adequate to maintain the construction schedules that have been proposed.

Construction Workers

The area which determined the recruitment of construction workers for the Kentucky Project was the area decided upon for the 1938 Workmen's Examination. Registers of eligible candidates were established as a result of the examination and it is expected that the names of candidates on these lists will be adequate for the construction of the Kentucky Dam. Only in the event of demand

for workers that cannot be supplied from these lists will applications from other sources be considered. This departure from procedure does not seem to be a probability in the near future except in very few instances of special requirements.

For one thing, young Mrs. Paducah was raised on Rhodes-Burford's. Her own crib-bed—from the time she could remember. Her mother's. New stove and rug. That easy chair they all gave Dad one Christmas, and the adorable, frothy dressing table she got for her sixteenth birthday.

Now young Mr. "P" quite frankly didn't know or care where the chairs he draped his adolescent limbs over came from. All he knew about rugs was that he was alleged to track mud on them. And dog hairs showed up something awful on the green sofa.

But he knows "Mom" knows. Especially when it comes to making the most of a dollar. And of course she said "Rhodes-Burford's."

WHEAT GROWERS MAILED THEIR '40 ALLOTMENTS

Wheat producers of the county having wheat acreage allotments under the A.C. Program, have been mailed their 1940 allotments, according to Jack Gatlin, Chairman A. C. Committee.

The acreage will be checked on a seeded acreage basis. Mixtures of wheat and other small grains of winter legumes such as vetch, or Austrian peas, will not be considered as wheat but will be classified as soil depleting. Deductions at the wheat rate will be made under the Conservation Program for an excess of wheat acreage allotment.

All non-allotment farms in the county may harvest their usual acreage of wheat, or ten (10) acres, whichever is the larger. Wheat on these farms will be classified as soil depleting crop and the harvested acreage rather than the planted acreage will be used in checking performance. Any farm will be eligible, at the option of the operator to be classified as a non-allotment farm.

All commercial allotment farms who desire to be classified as non-commercial should notify County Office by September 30.

Farmers Invited To Enter Soil Building Contest

Farmers of the county who expect to compete in soil building contest being conducted this year, should leave their names at the County Agent's office.

The contest is open to all farmers of the county, and cash awards will be made to the first two farmers reporting, while certificates of merit will be received by all who qualify and name will be placed on honor roll, states H. E. Rothwell, county agent. Rules of the contest may be obtained at the office in Benton. One of the requirements is to seed all land cultivated this year to a cover crop. The contest closes October 31, and is being sponsored by local Farm Bureau and Young Men's Progress club of Benton.

RESOLUTIONS OF RESPECT

Whereas, God in His infinite wisdom has taken from our midst our dear sister, coworker and esteemed friend, Julia Chumler, age 70 years 1 month, 17 days.

She has been a consistent christian, ever ready to extend a helping hand to the unfortunate and loved by all; let us here to weep. Till we are called to follow her and in the grave to sleep.

But if she could no longer stay to cheer us with her love, we hope to meet her again. In that bright world above.

Therefore, be it resolved: First, That the church and Sunday School of Zion's Church, deeply feel the loss of sister Chumler's presence can only be submissive to our Father's will.

Second, That we extend to the bereaved family of our deceased sister, our tenderest sympathies.

Third, That a copy of these resolutions be sent to members of the deceased's family, that one copy go on the church Record and that one be sent to the Tribune Democrat for publication.

UNITY SCHOOL NEWS

Friday closed the first six
weeks of our school at Uni-
ty. Mrs. Henderson is our
new teacher this year. We
like her fine and everyone
seems to be very interested
in school.

The girls and boys of the

ganized a soft ball team this
week, which seems to be the
center of attraction in ath-
letics.

A pie supper is being plan-
ned for Friday night, Septem-
ber 15. The Kentucky Blue-
Birds from Station WPAD
will entertain us with music.

Hollywood's appraisal of Bob
Baker's latest Universal mus-
ical production, "Honor of
the West," coming Saturday
to the Benton Theatre.

Romance, music and melo-
drama, have not been neg-
lected in the story, state the
advance reports which out-
line the compact, swift mov-
ing plot as an unusually
logical vehicle for the popu-
lar cowboy star, Bob, "Sing-
in' Sheriff" in the film, is

trailing cattle rustlers while
a love triangle and a mon-
tain feud make his opera-
tions more hazardous.

We Do Not Claim To Be A PROPHET

We can't say what will happen, but we do know what
has happened. Wholesalers and Mills have been forced
to raise Prices for two reasons.

1. The Federal Wage and Hour Law boosts wages 20 per
cent effective October 1st in the Textile Industry.
2. The War Crises has boosted Cotton Prices to new high
levels for the year. Prices have risen very sharply in
all lines in the last two weeks.
